

# QUALITY POLICY

# EVALCRIS,

The Policy of the **EVALCRIS** Management System, as a company dedicated to providing promotional and advertising services, as well as importing and exporting promotional products, is developed and approved by the Manager and is defined as follows:

From the **EVALCRIS Management**, we are committed to implementing and maintaining an updated Quality and Environmental Policy through a Quality and Environmental Management System in accordance with the UNE-EN-ISO 14001:2015 and UNE-EN-ISO 9001:2015 standards, as a tool to achieve:

The management of this system and its correct and effective implementation require coordination from all departments of the company and the participation of their respective human and technical resources. Only then can we respond to the new demands posed by the market, such as:

- Customers demand a higher level of product control and quality management in order to reduce indirect costs derived from poor management.
- Regulatory requirements increasingly demand proper quality management, including new laws on safety and health, regulation of raw materials, and environmental protection.
- Compliance with the requirements and expectations of our customers.
- Compliance with legal, regulatory, and normative requirements applicable to our activities, as well as any requirements related to environmental aspects subscribed to by the organization.
- Providing the necessary level of training for efficient performance of our workers' duties and tasks.
- Continuous improvement in the performance of our activities and the effectiveness of the System.
- Pollution prevention and minimization of the environmental impact of our activities.
- To achieve these goals, the Management will provide the organization with the necessary technical, economic, and human resources, and the Policy will be reviewed annually to verify its suitability for meeting the set objectives and for the organization's context and purpose.
- The Quality and Environmental Policy will be made available to all employees of the company, ensuring that it is understood, comprehended, and implemented. It is also available to all interested parties.
- The effective implementation of these principles requires full support from both the management team and all the staff of the organization.

**EVALCRIS's** general policy aims to position the company among the most competitive companies in the Telecommunications sector, without forgetting all related stakeholders such as employees, customers, suppliers, and investors, whose objective is the profitability of the company.

These needs lead the Management to declare quality as a top strategic objective, based on three fundamental principles:

This policy will be reviewed annually and made available to all members of the organization. The Quality and Environmental Policy will be made public, both for the employees of the company, ensuring that it is understood, comprehended, and implemented, as well as for any interested external party. The effective implementation of these principles requires full support from both the management team and the entire staff, as well as approved suppliers.

This Policy will be communicated and understood by all members of the organization. **EVALCRIS** has a notice board visible to all staff, where the Quality and Environmental Manager posts a copy of the Quality and Environmental Policy.

Signed:

*Javier Villaseco*  
*Manager of Evalcris, s.l.*
